437-477-1303 | 1nadeemahm@gmail.com | <https://www.linkedin.com/in/AhmedNadeem>

Technical Skills

Languages: C, C++, C#, **Python**, **Java**, **JavaScript**, TypeScript, **SQL**, HTML, CSS,
Frameworks/Platforms: Node.js, **React**, **FastAPI**, **Azure**, **Git**, **PyTorch**, **Excel**, **PowerPoint**, **Power BI**, **Power Query**,
DAX
Concepts: **Data Analytics**, **Data Visualization**, **Statistical Analysis**, **SQL Querying**, ETL & Data Cleaning, **KPI**
Reporting, A/B Testing, Time Series Analysis
System Design, **Decision Systems Design**, Database Design, Performance Optimization, Machine Learning, Model
Deployment, CI/CD.

Projects

Ontario EV Adoption & Infrastructure Forecasting Platform | SQL, Python, Power BI, Public APIs Ongoing

- Designing a **data-driven analytics platform** to evaluate **electric vehicle (EV) adoption trends in Ontario** using **multi-source public datasets** and relational data modeling.
- Building a **SQL-backed data warehouse** integrating EV registration data with charging station infrastructure data to compute **EV-to-charger ratios**, **regional disparities**, and long-term adoption patterns.
- Developing **Python-based forecasting models** to project EV growth over the next 3–5 years and assess whether infrastructure expansion is keeping pace, visualized through interactive **Power BI dashboards**.

Ontario Vehicle Brand Prevalence Analytics | Web Dev: SQL, Python, Power BI, Excel January 2026

- Built an **end-to-end analytics pipeline** to identify the **most prevalent car brands in Ontario** using **public, aggregated vehicle population data**; framed results as **brand prevalence (registrations)** rather than mileage-based driving.
- Developed a **Python parsing and cleaning workflow** to extract tabular report data, **normalize make/brand values**, **filter passenger vehicles**, and aggregate totals by **Make × Model-Year**, outputting **analysis-ready datasets**.
- Modeled cleaned data in **SQL** as a **queryable source of truth** and created **Power BI dashboards (Top Brands, Market Share, YoY Growth, interactive filters)**, with **Excel validation checks** to verify totals and trends.

Data Cleaning & Transformation Pipeline | Excel, Power Query November 2025

- Built a repeatable **Power Query ETL pipeline** to clean messy transaction data (duplicates, inconsistent casing, mixed date formats, currency stored as text) into an **analysis-ready table**.
- Implemented automated transformations including **type casting**, **trim/clean**, **standardization**, **invalid record filtering**, and **de-duplication**, engineering fields like **Year/Month** and **Revenue** for reporting.
- Produced clear **before/after documentation** of data issues and fixes and enabled **one-click refresh** for future updates, improving data accuracy and downstream usability for dashboards/pivots.

Education

Wilfrid Laurier University

Expected May 2028

Bachelor of Economics

Relevant Coursework: Introduction to Microeconomics, Introduction to Macroeconomics, The Canadian Economic System, Money, Banking & Financial Markets

Experience

The Water Store

August 2025 - Current

Sales Associate

Milton, ON

- Built and maintained **strong customer relationships** by identifying needs through targeted questioning and delivering **tailored product recommendations**, supporting repeat business and long-term customer satisfaction.
- Drove **consistent sales performance** through **consultative selling** and clear communication, leveraging strong product knowledge to guide customers toward **informed purchasing decisions** and effective upselling opportunities.
- Delivered detailed **product explanations and demonstrations**, translating technical information into **customer-focused benefits** that increased buyer confidence and improved closing rates.
- Collaborated with team members to support **daily sales operations**, refine sales strategies, and maintain a **professional, customer-focused retail environment**.
